

The future of finance

Financial technology (fintech) comprises new-age technology and innovation that aims to compete with traditional financial methods in the delivery of financial services. BBD implements fintech solutions for financial services groups and investment management to ensure they stay ahead of the curve.

Why choose BBD as your fintech software partner:

- › We truly understand software and finance
- › We help align our clients' business models to their IT requirements
- › We build cutting-edge mobile, web, and back-end solutions
- › We keep up-to-date with the latest fintech trends

Replatform

› Broker management

We develop and maintain international broker websites, providing brokers with high-end internationally acclaimed brokerage tools

› Payment systems

We understand the need for overall cloud-based payment solutions, which are also compliant

› Portfolio management

Leveraging fintech solutions has enabled us to create and streamline portfolio management tools for large financial services providers

› Trading platforms

By recognising the client's strategic vision, we implement beneficial risk management control, data feed integration and web and mobile solutions

Our expertise and experience in finance coupled with our state-of-the-art technology solutions ensure organisations within the fintech space are easily able to adapt to and align with new technological developments. From sophisticated systems that streamline business processes to advanced tools that make management and integration easy, we have the right solutions for this ever-evolving sector.
